Tallahassee, FL 32304

September 14, 2017

My previous work experiences and skills I have learned to acquire for the past 4 years of my college career makes me an ideal candidate for an Entry Level Application Development/Testing Specialist with IBM. I have been in two different social organizations, not was I just a member in those two organizations, I took officer positions as a Treasurer. Through officer experiences, I have learned to develop leadership, teamwork, communication, honesty, and mentorship skills.

Few of my technical skills I have learned are Java, HTML, CSS, Bootstrap, MySQL, SQL, PHP and Java/JSP. I have also created my own personal website to showcase some of my projects I have accomplished over the years ([www.dongminhong.com](http://www.dongminhong.com)).

I believe that my flexibility skills, willingness to initiate and my leadership skill will help IBM to move forward to its success. I have few experiences with working with different customers and am very experienced in various ways in dealing with the customers.

If you have any questions, please feel free to contact me in any time. I look forward to hear back from you!

Sincerely,

Dong Min Hong
